<p>similar instruments issued by various public or private-sector entities. The Portfolio Manager will enter into FDIs for hedging, optimal portfolio management purposes and to actively take positions in the global bond, money market, interest rates and currency markets.</p>	
<p>Parties Involved</p>	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Managers are UOB Asset Management Ltd. • The Management Company and Portfolio Manager of the Underlying Fund are Robeco Luxembourg S.A. and Robeco Institutional Asset Management B.V. respectively. • The Trustee is State Street Trust (SG) Limited. • The Custodian is State Street Bank and Trust Company, Singapore Branch. 	<p>Refer to <u>paragraphs 2 and 3</u> of the Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.</p>
<p>KEY RISKS</p>	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Sub-Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to <u>paragraph 7</u> of the Prospectus and <u>paragraph 5</u> of <u>Appendix 3</u> of the Prospectus for further information on risks of the product.</p>
<p>Market and Credit Risks</p>	
<ul style="list-style-type: none"> • You are exposed to market risks. Prices of the securities that the Sub-Fund invests in may be affected by changes in economic conditions, interest rates and the market's perception of the securities, which in turn may affect the value of your investment. • You are exposed to fixed income and debt securities risks. Adverse changes in the financial condition of the issuer of fixed income or debt securities invested in, or in general economic conditions, or both, or an unanticipated rise in interest rates, may increase the potential for default which may affect the value of your investment. 	
<p>Liquidity Risks</p>	
<ul style="list-style-type: none"> • The Sub-Fund is not listed and you can redeem only on Dealing Days. There is no secondary market for the Sub-Fund. All realisation forms should be submitted to the Managers' authorised agents or distributors. • You are exposed to liquidity risks in the Sub-Fund's investments. In difficult market conditions, reduced liquidity in bond markets may make it harder for the Portfolio Manager of the Underlying Fund to sell assets at the quoted price. This could have a negative impact on the value of the Sub-Fund's investment. 	
<p>Product-Specific Risks</p>	
<ul style="list-style-type: none"> • You are exposed to feeder fund risk. The Sub-Fund invests all or substantially all of its assets into the Underlying Fund and is subject to the specific risks applicable to the Underlying Fund. The Sub-Fund is also exposed to fluctuations in value of the Underlying Fund. Prospective investors must also be aware that the performance and returns of the Sub-Fund may not fully align with that of the Underlying Fund due to the way in which the Sub-Fund is operated and/or its assets are invested. • You are exposed to foreign exchange / currency risk. Where investments are denominated in a currency that is different from the currency of denomination of the Sub-Fund or the relevant Class, fluctuations of the exchange rates of such currencies against the currency of the Sub-Fund or Class may affect the value of Units. The Managers may hedge the foreign currency exposure of the Sub-Fund or Class and may adopt an active or passive currency management approach. Where a Class is not denominated in SGD, changes in the exchange rate between SGD and the Class currency may adversely affect the value of the Units of such Class. <i>Hedged Classes:</i> The Managers currently adopt a passive hedging policy while retaining the discretion to adopt any other hedging policy. • You are exposed to high yield bonds risk. A significant proportion of the Underlying Fund may be invested in high yield bonds which are not rated by a credit rating agency. These bonds carry a greater risk of not being able to pay the income as promised or return the capital used to purchase the bond. Changing market conditions and interest rate levels can also have a larger impact on the value of these bonds compared to other bonds. 	

- **You are exposed to derivatives risks.** An investment in a FDI may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss.
 - **You are exposed to risks relating to distributions.** Dividend/interest income may be adversely affected by e.g. investee entities suffering unexpected losses and/or paying lower than expected dividends, and currency fluctuations. Distributions from capital may reduce part of your original investment and result in reduced future returns. Distributions (out of capital or otherwise) may have the effect of lowering the NAV of the Sub-Fund or the relevant Class.
- You should be aware that the Sub-Fund may be exposed to other risks of an exceptional nature from time to time. You should also refer to the Prospectus for other risks which the Sub-Fund may be exposed to, pursuant to its investment in the Underlying Fund.**
